Ecrypt PICO*freedom*

USB flash drives are extremely popular for transporting data. This is down to convenience in terms of their size and easy to use plug-and-play facility.

Unfortunately their greatest asset is their greatest downfall; as small and convenient as they are, the more likely they and their data are to be misplaced, lost or stolen. This could mean the loss of sensitive customer data, a tarnished reputation and heavy fines.

Ecrypt PICO*freedom* addresses these concerns with its hardware-based, FIPS 140-2 level 2 validated encryption that protects mobile data inside and outside the corporate environment. All files are encrypted 100% of the time, ensuring maximum security alongside its tamper-resistant design.

You can be sure that even when lost or stolen, data stored on Ecrypt PICO*freedom* remains confidential between you and your customers.

USB Flash Drive Product Specification

256-bit AES encryption

Mandatory security of all files

Strong password authentication

**Lockdown mode after several
incorrect password attempts**

**Transfer speeds: 24MB/s Read
20MB/s Write**

Supported Platforms:

Windows 2000 (SP4)
Windows XP (SP1, SP2)
Windows 2003 Server
Windows Vista

Options:

FIPS 140-2 Validated Model
PICO Management Software
1GB, 2GB, 4GB or 8GB Capacity

FlagStone Technology ~ Hardware Encryption at its Best

Ecrypt integrates sophisticated authentication, entire disk encryption and data storage into tamper-resistant internal or portable hardware that safeguards your data. This provides instant data protection without any adverse effects on your computer's performance.
